Senior Content Designer with 12 years of experience across technical writing, UX writing, content systems and AI workflows. Specialised in regulated and technical product environments.

EXPERIENCE

Teachers Health - Senior Content Designer for the Digital Member Experience

NOVEMBER 2025 - MAY 2026

Led content design across digital member experiences during a period of platform transformation, partnering with product, UX and business teams to improve clarity, consistency and member outcomes across web and app.

Key contributions:

- Established **content design foundations** as the organisation's first Content Designer, introducing ways of working including content critiques and cross-functional collaboration practices.
- Designed and delivered UI content across key digital features in the member portal and app, ensuring clarity, accuracy and alignment with member tasks.
- Developed a **content strategy** and centralised content hub with style guide to support consistency, governance and scalable content practices.
- Website: Led end-to-end content design for a member self-service content uplift, auditing existing FAQ and procedural content, identifying structural gaps, and redesigning the experience into clear, task-based how-to guides. Restructured information architecture to improve findability and reduce content fragmentation, using member language and natural search terminology throughout. Delivered metadata for all new pages and contributed to reducing support channel dependency through improved digital self-service.
- Authored a comprehensive member guide for multi-factor authentication, including UI copy, support content and member-facing instructions for authentication setup and recovery.
- Audited existing content and experiences to identify gaps, improve usability and support digital adoption.

CORE CAPABILITIES

Content strategy:

Content governance,
Information architecture,
Scalable frameworks,
Cross-channel strategy
Style guides

Design systems

Content design

UX writing

Service design

User-centric design

Technical writing & documentation

Instructional design

Marketing copywriting

Microcopy

UX/UI design - Low to

- Contributed to improving ways of working across product and design, advocating for earlier content involvement in discovery and journey design.
- Built Microsoft Copilot agents for tone, terminology and consistency review, integrating AI into content design quality workflows.

UniSuper – UX Content Consultant

FEBRUARY 2025 - NOVEMBER 2025

Leading content design for UniSuper’s insurance continuous improvement project, I collaborated with cross-functional teams to create clear, user-focused experiences across the public website and **online member portal**.

Key contributions:

- **Audited** and **uplifted** the insurance information architecture to identify content gaps, improve findability and simplify complex concepts.
- Applied AI-assisted research and content analysis to identify content gaps and patterns in the insurance information architecture.
- Led greenfield content design and strategy for a new digital claims experience, collaborating with product, design, product owners, and operations to shape member journeys from the ground up.
- Championed accessibility (WCAG 2.2), SEO and regulatory compliance, ensuring all content met legal, risk and brand requirements.
- Mentored a peer UX Content Consultant, strengthening team capability and elevating content quality across digital projects.

Active Locals (backed by HCF) – Content Designer (contract)

JANUARY 2025 - FEBRUARY 2025

- Led UX content strategy and copywriting for HCF’s *Active Locals* app, optimising onboarding, group creation, and event discovery flows to make social exercise more accessible and engaging for Australians.
- Developed intuitive, research-backed language and marketing copy, including social media content, to drive user adoption and retention.
- My work combined content strategy, UX writing, and user research insights to support the app’s pilot and measurable engagement goals.

TOOLS AND PLATFORMS

UX research:
Optimal
Workshop,
Treejack, Askable

Design: Figma,
Figjam, Canva,
Miro

Marketing:
Sitecore, HubSpot

AI: Chat GPT,

AMP – UX Writer

JANUARY 2023 - DECEMBER 2024

As the UX Writer for AMP’s Digital Growth team within Marketing, I shaped the user experience of digital products, empowering customers to navigate their financial journeys with ease and confidence. Collaborating with the Digital Experience Design team, I ensured the entire user journey, from

digital interactions to human touchpoints, delivered a seamless and satisfying experience.

Key contributions:

- Led the digital and marketing team's content stream for the AMP website uplift in 2024, coordinating content audit, IA decisions, and content migration across multiple verticals.
- Designed an Integrated Digital and Marketing Workflow mapping seven project phases with content phase overlays. Defined roles, responsibilities, tasks and deliverables at each handover point to improve cross-functional content delivery.
- Led **user research and usability testing** for the NorthOnline website uplift using tools like Askable and Optimal Workshop to validate design decisions and content effectiveness. This work contributed to a 100% increase in average conversion rate. Also supported SEO keyword optimisation, improving the site's search ranking from position 35 to 18.
- Collaborated on **service design** and UX writing for AMP's mobile and web apps, mapping end-to-end journeys and creating clear, accessible content for key experiences such as insurance onboarding through superannuation. I also partnered with cross-functional teams to align back-end processes and front-end content across **multiple touchpoints**.

Zai - Customer Documentation Manager

FEBRUARY 2022 - OCTOBER 2022

Owned the knowledge base and developer-facing API documentation for a global fintech platform.

Responsibilities:

- Created **user guides** for new capabilities, including Bank-to-Bank Transfers for UK customers and PayTo, and overhauled online documentation to be market-agnostic for **global scalability**.
- Developed and implemented **new processes** for delivering customer-facing technical documentation and aligning terminology across all related communications.
- **Partnered** with Product, Marketing and Engineering teams to embed documentation activities into delivery workflows and improve collaboration on API reference descriptions.
- Overhauled content in ReadMe for global scalability, ensuring documentation kept pace with API releases.

Atlassian - Content Designer

MARCH 2019 - FEBRUARY 2022

Sole Content Designer for Bitbucket, Atlassian's Git version control product. Owned in-product UX content and customer documentation for

Claude, Copilot, Lovable

Git platforms:

Bitbucket, GitLab, GitHub

Atlassian Suite:

Jira, Confluence, Trello

Content

Management

Systems (CMS):

Adobe Experience Manager (AEM), Confluence, Umbraco, SharePoint

ReadMe

HTML, Markdown

API: Postman,

SwaggerHub, ReadMe

Analytics: Adobe

Analytics, Google Analytics

Microsoft Office

Suite

developer-facing workflows including repositories, permissions, branching, code review, pull requests and pipelines.

Key contributions:

- **Independently** managed multiple projects from concept to publication under **tight deadlines** of 5-week release cycles.
- Improved in-product copy linking by identifying inconsistencies and **accessibility** issues, leading to new guidelines in the Atlassian Design System. This helped users with visual impairment understand what 'Learn more' would lead them to, providing more context within the links.
- Enhanced developer documentation **consistency** across multiple products through continuous refinements and **cross-functional collaboration** with developers, product managers and designers.
- Led a topic-based authoring course on Contentful for Content Designers, leveraging expertise and a passion for **knowledge sharing**. This helped lead the content design practice to achieve more team members upskilling when Contentful was rolled out to them.
- Contributed to knowledge base documentation.

Instructional Designer, Illustrator – Self-Employed · Freelance

AUGUST 2018 – APRIL 2019

- Developed eLearning storyboard scripts, wrote assessments, and organized the overall content for online courses that certify professional, wireless communications installers.
- Edited and proofread primary school teacher guides in Adobe InDesign.
- Illustrated 2D and 3D designs in Adobe Illustrator

Siemens PLM Software, Michigan USA – Information Developer

Instructional Design | Technical Writing

SEPTEMBER 2014 – NOVEMBER 2018

Developed technical training solutions and customer product documentation for NX (Unigraphics), a complex 3D parametric modelling software used by engineers globally.

Achievements:

Designed new NX CAD models for courseware.

Initiated and carried out courseware reorganization and construction of the NX Product Manufacturing and Information tool.
